

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

OPEN LETTERS.

TO BRYOLOGISTS.

THE undersigned desires to make a full canvass of all working bryologists and collectors of mosses, both American and foreign, believing that a better general acquaintance will further both the friendly and scientific spirit. To this end the following data are cordially solicited from all who have not already sent them :

1. Name in full ; age ; vocation.
2. Average time your vocation annually permits you to devote to mosses.
3. A list of your bryological publications ; also a list of exsiccata you may have distributed.
4. Have you worked on any foreign moss flora ? State in which geographical region you are most interested.
5. Which genera, or larger groups, are you making your specialty ?
6. Are you desirous to have referred to you for critical examination species that fall in the line of your special interest ?
7. Do you exchange mosses ? If so, what material do you offer ?

A circular embodying these questions was sent out in June of the present year. It was answered so approvingly and enthusiastically that I feel justified in making an additional effort to make the data as complete as possible, to put them when collected into permanent form, and to place them finally in the hands of each one interested.—JOHN M. HOLZINGER, *Winona, Minn.*
